

QUARTERLY REPORT 3 months ending 31th March 2017

REVIEW OF OPERATIONS

1. Corporate

Executive Search

The Company has been undertaking an executive search for a new managing director and has made good progress in identifying suitably qualified and experienced candidates. Discussions are ongoing and further announcements will be made as required.

Capital Raising

The company raised \$396,286 from a rights issue at 1.3 cents per share during the quarter. The shortfall will be placed to selected investors or put to Provident Minerals Pte Ltd as per the underwriting agreement.

The Saratoga and Provident Groups have indicated they remain supportive of the Company and are comfortable with the strategy the company is following.

Management continues to work with major shareholders and other potential financiers, to explore options to finance the construction phase while completing further evaluation and optimisation of the project.

2. Sihayo Pungkut Gold Project

The Sihayo Pungkut Gold Project is located within a Generation VII Contract of Work (CoW) located in Northern Sumatra Indonesia, as per Figure 1 below.

The Company holds an interest in the Project through 100% ownership of Aberfoyle Pungkut Investments Pte Ltd (API). The CoW is held by PT Sorikmas Mining (Sorikmas) which is operated under a Joint Venture arrangement between API - 75% and PT Aneka Tambang – 25% (ANTAM).

The Project has Mineral Resources of Measured, Indicated and Inferred containing 1.4M gold ounces¹ reported in accordance with JORC 2012 within which is contained a combined Proved and Probable Ore Reserve of 554,000 gold ounces².

The Company continues to work toward completion of Statutory permitting & approvals as well as investigation of opportunities to further optimise the results of the feasibility study announced in relation to the Sihayo Pungkut Gold Project ("the Project") on 29 January 2014.

In March 2017 the Company signed an amendment to the Contract of Work. The 2 material changes are to bring royalties into line with current regulations and divestment is to begin in year 6 of

production, to reach 51% by year 10. The financial impact of these changes will be included in the ongoing review of the feasibility study.

¹ No new information has been included since the information was released in an announcement on 17/06/2013

² No new information has been included since the information was released in an announcement on 29/01/2014

Feasibility Study Optimisation

Review of the 2014 feasibility study is ongoing with work continuing in areas of metallurgy and geo-metallurgy as well as capital and operating costs. Data continues to suggest improvements to project economics assumed in the 2014 study can be made.

The geo-metallurgy review and report being completed by Sam Garret is well advanced.

Discussions continue around PLN power supply to the project.

Additional metallurgical test work on alternative processing routes for low recovery ore types continued with a focus on caustic leaching under variable leaching conditions. Preliminary results continue to indicate a substantial improvement in recovery relative to cyanide leaching alone. Tests to investigate caustic consumption rates and investigate preliminary process economics have been undertaken.

Further updates will be provided in due course as sufficient information comes to hand.

4. Surface Exploration

A surface sampling program to follow-up on areas of interest identified in the Simon Meldrum report has been planned.

SIHAYO GOLD LIMITED

Misha Anthony Collins

Chairman

28th April 2017

Note

All statements in this report, other than statements of historical facts that address future timings, activities, events and developments that the Company expects, are forward looking statements. Although Sihayo Gold Limited, its subsidiaries, officers and consultants believe the expectations expressed in such forward looking statements are based on reasonable expectations, investors are cautioned that such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward looking statements. Factors that could cause actual results to differ materially from forward looking statements include, amongst other things commodity prices, continued availability of capital and financing, timing and receipt of environmental and other regulatory approvals, and general economic, market or business conditions.

Mineral Resources and Ore Reserves

The information is extracted from the reports entitled "Mineral Resource Estimation of the Sihayo & Sambung Deposits, Sumatra Indonesia" created on 5 December 2013 and "Sihayo Open Pit Reserves" created on January 2014 and are available to view on www.sihayogold.com. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
